If you’re looking for an exciting learning environment where agronomists, animal scientists, biologists, horticulturists, microbiologist and pathologists work collaboratively to tackle challenging biological questions … Genetics and Genomics at Iowa State University is where you want to be!

Iowa State offers:
• Master’s and Ph.D. degree programs in genetics and genomics
• Specialized courses for cross-disciplinary training
• State-of-the-art facilities for genetics and genomics research
• A diverse and enthusiastic faculty

Interested in graduate study in Genetics and Genomics?
Undergraduates wishing to prepare for graduate study in Genetics and Genomics should elect courses in areas such as basic biology, chemistry, physics, mathematics, basic transmission and molecular genetics, statistics and biochemistry.

Graduate Program Office:
2014 Molecular Biology Building
2437 Pammel Drive | Ames, Iowa 50011-1079

MEET A STUDENT:
ANGELA BUNNING
HOMETOWN: ST. LOUIS, MO
Favorite Class at ISU and why: I loved GDCB 511 (Molecular Genetics). I enjoy talking about molecular biology, and I liked learning about foundational experiments that have helped us understand molecular genetics even today.

What made you choose ISU: By being in an interdepartmental program like IGG, I was able to experience a lot of different kinds of research. I wasn’t sure what I wanted to study when I came to ISU, and so being able to rotate through different departments was exciting, and helping me better understand all the research that is going on at ISU, and I got to meet many different people.

What are your career goals: I would like to work in a government lab or industry as a research scientist. I also hope to do science outreach via science communication. I enjoy talking to scientists about my work!
